| 2038-01-18 | TBD    | Idea      | PHP or generic programming language     | ?                       |            |                 |              |
| 2038-01-18 | TBD    | Idea      | Desktop Environment roundup             | ?                       |            |                 |              |
| 2038-01-18 | TBD    | Idea      | Desktop Distro roundup                  | ?                       |            |                 |              |
| 2038-01-18 | TBD    | Idea      | Bitcoin                                 | ?                       |            |                 |              |
| 2038-01-18 | TBD    | Idea      | Emacs                                   | Deech?                  |            |                 |              |
| 2038-01-18 | TBD    | Idea      | OpenID/OAuth                            | ?                       |            |                 |              |
| 2038-01-18 | TBD    | Idea      | Mind-mapping Applications               | ?                       |            |                 |              |
| 2038-01-18 | TBD    | Idea      | Fedora Design Suite                     | ?                       |            |                 |              |
| 2038-01-18 | TBD    | Idea      | SASL                                    | ?                       |            |                 |              |
| 2038-01-18 | TBD    | Idea      | Fedora Security Lab                     | ?                       |            |                 |              |
| 2038-01-18 | TBD    | Idea      | R statistics package                    | ?                       |            |                 |              |
| 2038-01-18 | TBD    | Idea      | NoSQL                                   | ?                       |            |                 |              |
| 2038-01-18 | TBD    | Idea      | MAC OSX server                          | ?                       |            |                 |              |
| 2038-01-18 | TBD    | Idea      | Wehrenberg Theaters Digital Projectors  | ?                       | Gary       |                 |              |

# Planning Schedule Saint Louis Unix Users Group

**June 23, 2020 ~ 02:40 PM**

| When       | Type | Status  | What   | Who                          | Wrangler     | Email               | Phone |
|------------|------|---------|--|------------------------------|--------------|---------------------|-------|
| 2038-01-18 | TBD  | Idea    | coreboot   | ?                            |              |                     |       |
| 2038-01-18 | TBD  | Idea    | GUI builders   | ?                            |              |                     |       |
| 2038-01-18 | TBD  | Idea    | Hostirian/Primary.NET Data Center                        | ?                            |              |                     |       |
| 2038-01-18 | TBD  | Idea    | CPUs   | ?                            |              |                     |       |
| 2038-01-18 | TBD  | Idea    | Developing for (web, native) iPhone                      | ?                            |              |                     |       |
| 2038-01-18 | TBD  | Idea    | Solaris or OpenSolaris current release, features, future | ?                            |              |                     |       |
| 2038-01-18 | TBD  | Idea    | HP-UX current release, features, future                  | ?                            |              |                     |       |
| 2038-01-18 | TBD  | Idea    | Red Hat Enterprise Linux (RHEL) or Fedora                | Tried Clark Smith at Red Hat |              |                     |       |
| 2038-01-18 | TBD  | Idea    | SuSE or OpenSUSE recent releases                         | Gary Hollingsworth?          |              |                     |       |
| 2038-01-18 | TBD  | Idea    | AIX current release, features, future                    | Someone from IBM corporate?  |              |                     |       |
| 2038-01-18 | TBD  | Idea    | Apple current release, features, future                  | ?                            |              |                     |       |
| 2038-01-18 | TBD  | Idea    | Setting up an Email server                               | ?                            |              |                     |       |
| 2038-01-18 | TBD  | Idea    | Current tools for web development                        | ?                            |              |                     |       |
| 2038-01-18 | TBD  | Idea    | Recovering from disaster                                 | ?                            |              |                     |       |
| 2038-01-18 | TBD  | Idea    | Munin (resource monitoring)                              | ?                            |              |                     |       |
| 2038-01-18 | TBD  | Idea    | Gnome 3 (getting past the hate)                          | ?                            |              |                     |       |
| 2038-01-18 | TBD  | Idea    | Geo-separation of data centers                           | ?                            |              |                     |       |
| 2038-01-18 | TBD  | Idea    | 3D Printing  | ?                            |              |                     |       |
| 2038-01-18 | TBD  | Idea    | Gaming on Linux with Steam                               | ?                            |              |                     |       |
| 2038-01-18 | TBD  | Idea    | pfSense (firewall/router)                                | ?                            |              |                     |       |
| 2038-01-18 | TBD  | Idea    | Ansible (more in-depth, hands-on)                        | ?                            |              |                     |       |
| 2038-01-18 | TBD  | Idea    | Recent NSA and Security Updates                          | ?                            |              |                     |       |
| 2038-01-18 | TBD  | Idea    | VPN - Virtual Network Computing                          | ?                            |              |                     |       |
| 2038-01-18 | TBD  | Idea    | GPU processing   | ?                            |              |                     |       |
| 2038-01-18 | TBD  | Idea    | Diversity in Tech  | ?                            |              |                     |       |
| 2038-01-18 | TBD  | Idea    | Homebrew on Linux, macOS and Win10                       | ?                            | Don Ellis    | don.ellis@gmail.com |       |
| 2038-01-18 | TBD  | Speaker | GIMP   | Scott Nesler                 |              |                     |       |
| 2038-01-18 | TBD  | Speaker | PGP and GPG  | Scott Nesler                 |              |                     |       |
| 2038-01-18 | TBD  | Speaker | Mailman  | Jeff Muse                    |              |                     |       |
| 2038-01-18 | TBD  | Speaker | Oracle Solaris   | Jeff Muse                    |              |                     |       |
| 2038-01-18 | TBD  | Speaker | Android  | Mark Volkmann                |              |                     |       |
| 2038-01-18 | TBD  | Speaker | Developing for Mobile Platforms                          | Mark Volkmann                |              |                     |       |
| 2038-01-18 | TBD  | Speaker | Perl   | Steven Lembark               | Gary         |                     |       |
| 2038-01-18 | TBD  | Speaker | Round-table on Joe User (moderator)                      | Mike Wilkerson               |              |                     |       |
| 2038-01-18 | TBD  | Speaker | Open Grid Computing                                      | Sanjiv Bhatia, UMSL          | Lee          |                     |       |
| 2038-01-18 | TBD  | Speaker | Natural Language Processing                              | Kevin Scannell, SLU          |              |                     |       |
| 2038-01-18 | TBD  | Speaker | TBD  | David Klein                  |              |                     |       |
| 2038-01-18 | TBD  | Speaker | IBM AIX ver 7.2 TL4 released Nov 2019                    | Sanjiv Bhatia, UMSL          | Lee          |                     |       |
| 2038-01-18 | TBD  | Speaker | Security Topics  | Phil Cryer                   |              |                     |       |
| 2038-01-18 | TBD  | Speaker | TBD  | Scott Granneman, WUSTL       | Gary         | scott@granneman.com |       |
| 2038-01-18 | TBD  | Speaker | TBD  | Jim Roe                      |              |                     |       |
| 2038-01-18 | TBD  | Speaker | TBD  | Rick Clark                   |              |                     |       |
| 2038-01-18 | TBD  | Speaker | TBD  | Tony Lovasco of EPC          |              |                     |       |
| 2038-01-18 | TBD  | Speaker | TBD  | Gerry Stutte                 |              |                     |       |
| 2038-01-18 | TBD  | Speaker | TBD  | Alan Griggs                  | Gerry Stutte |                     |       |
| 2038-01-18 | TBD  | Speaker | TBD  | David Letscher               | Gary         |                     |       |
